

### **Malvazija istarska 2024**

*Malvazija is our basic wine, to which we devote most of our attention, always trying to achieve a balance between the freshness, or its refreshing character, and the structure and stability. Therefore, our Malvazija has the fruitiness and minerality typical for fresh Malvasijas, and at the same time it also has complexity, depth and aging potential. It usually reaches its peak a year after the harvest and maintains it for three to five more years.*

#### **Description:**

*Clear greenish-yellow color, pronounced aroma and taste with a lot of freshness and intensity. Smell characterized by fresh fruitiness, with an emphasis on vineyard peach and lime with yellow and green stone fruit in the background. The taste is characterized by pleasant minerality, medium body, depth and long duration. Its first impression is freshness, then a varietal sweetness appears in the middle, and on the finish followed by citrus fruits mixed with mineral saltiness and a pleasantly bitter note.*

#### **Assortment and ratio**

*Istrian Malvazija 100%*

#### **Vineyard area**

*Istra, Motovun*

#### **Vineyard name**
